

Contents

Part I General High-Dimensional Theory and Methods	
Regularization After Marginal Learning for Ultra-High Dimensional Regression Models	3
Yang Feng and Mengjia Yu	
Empirical Likelihood Test for High Dimensional Generalized Linear Models	29
Yangguang Zang, Qingzhao Zhang, Sanguo Zhang, Qizhai Li, and Shuangge Ma	
Random Projections for Large-Scale Regression	51
Gian-Andrea Thanei, Christina Heinze, and Nicolai Meinshausen	
Testing in the Presence of Nuisance Parameters: Some Comments on Tests Post-Model-Selection and Random Critical Values ...	69
Hannes Leeb and Benedikt M. Pötscher	
Analysis of Correlated Data with Error-Prone Response Under Generalized Linear Mixed Models	83
Grace Y. Yi, Zhijian Chen, and Changbao Wu	
Bias-Reduced Moment Estimators of Population Spectral Distribution and Their Applications	103
Yingli Qin and Weiming Li	
Part II Network Analysis and Big Data	
Statistical Process Control Charts as a Tool for Analyzing Big Data	123
Peihua Qiu	
Fast Community Detection in Complex Networks with a K-Depths Classifier	139
Yahui Tian and Yulia R. Gel	

How Different Are Estimated Genetic Networks of Cancer Subtypes?	159
Ali Shojaie and Nafiseh Sedaghat	
A Computationally Efficient Approach for Modeling Complex and Big Survival Data	193
Kevin He, Yanming Li, Qingyi Wei, and Yi Li	
Tests of Concentration for Low-Dimensional and High-Dimensional Directional Data.....	209
Christine Cutting, Davy Paindaveine, and Thomas Verdebout	
Nonparametric Testing for Heterogeneous Correlation	229
Stephen Bamattre, Rex Hu, and Joseph S. Verducci	
Part III Statistics Learning and Applications	
Optimal Shrinkage Estimation in Heteroscedastic Hierarchical Linear Models	249
S.C. Kou and Justin J. Yang	
High Dimensional Data Analysis: Integrating Submodels	285
Syed Ejaz Ahmed and Bahadır Yüzbaşı	
High-Dimensional Classification for Brain Decoding	305
Nicole Croteau, Farouk S. Nathoo, Jiguo Cao, and Ryan Budney	
Unsupervised Bump Hunting Using Principal Components	325
Daniel A. Díaz-Pachón, Jean-Eudes Dazard, and J. Sunil Rao	
Identifying Gene–Environment Interactions Associated with Prognosis Using Penalized Quantile Regression	347
Guohua Wang, Yinjun Zhao, Qingzhao Zhang, Yangguang Zang, Sanguo Zang, and Shuangge Ma	
A Mixture of Variance-Gamma Factor Analyzers.....	369
Sharon M. McNicholas, Paul D. McNicholas, and Ryan P. Browne
