Experiments

chapter 1 **Introduction** 1

- What Is Analytical Chemistry? 1
- The Analytical Process 2
- Range 6
- Review of Fundamental Concepts 7
- Concentrations of Solutions 9

chapter 2 **Expressions of Analytical Results** 17

- Solid Samples 17
- Liquid Samples 19

chapter 3 **Basic Tools of Analytical Chemistry** 25

- The Laboratory Notebook 25
- Laboratory Materials and Reagents 27
- The Analytical Balance 29
- Volumetric Glassware 36
- Other Apparatus 46
- Operations of Drying and Dissolving the Sample 53

chapter 4 **Data Handling** 59

- Significant Figures 59
- Rounding Off 63

| | |
|--|------------|
| Accuracy and Precision | 63 |
| Determinate Errors | 64 |
| Indeterminate Errors | 64 |
| Ways of Expressing Accuracy | 65 |
| Ways of Expressing Precision | 66 |
| Control Charts | 69 |
| The Confidence Limit | 70 |
| Tests of Significance | 72 |
| Rejection of a Result | 77 |
| Linear Least Squares | 79 |
| The Correlation Coefficient | 80 |
| chapter 5 Preparing a Solution of the Analyte | 89 |
| Drying the Sample | 89 |
| Sample Dissolution | 90 |
| chapter 6 General Concepts of Chemical Equilibrium | 95 |
| Chemical Reactions: The Rate Concept | 95 |
| Le Châtelier's Principle | 97 |
| Temperature Effects on Equilibrium Constants | 97 |
| Pressure Effects on Equilibrium Constants | 97 |
| Effect of Concentrations on Equilibria | 98 |
| Catalysts | 98 |
| Completeness of Reactions | 98 |
| Equilibrium Constants for Dissociating Species | 98 |
| Calculations Using Equilibrium Constants | 99 |
| The Common Ion Effect | 103 |
| Activity and Activity Coefficients | 103 |
| The Diverse Ion Effect: The Thermodynamic Equilibrium Constant | 107 |
| chapter 7 Gravimetric Analysis | 109 |
| Precipitation Equilibria: the Solubility Product | 109 |
| The Diverse Ion Effect on Solubility: K_{sp}° | 112 |
| Unit Operations in Gravimetric Analysis | 113 |
| Calculations | 121 |
| Examples of Gravimetric Analysis | 127 |
| Organic Precipitates | 127 |
| chapter 8 Principles of Volumetric Analysis | 137 |
| General Principles | 137 |
| Molarity Calculations | 139 |
| Normality Calculations | 147 |
| Titer | 153 |
| chapter 9 Acid-Base Equilibria | 157 |
| Aqueous Acid-Base Theories | 157 |
| Nonaqueous Solvents | 158 |
| Acid-Base Equilibria in Water | 160 |

| | |
|--|-----|
| The pH Scale | 162 |
| pH at Elevated Temperatures: Blood pH | 166 |
| Weak Acids and Bases | 166 |
| Salts of Weak Acids and Bases | 168 |
| Buffers | 171 |
| Polyprotic Acids and Their Salts | 176 |
| Physiological Buffers | 184 |
| Buffers for Biological and Clinical Measurements | 185 |
| The Diverse Ion Effect on Acids: K_a^o | 187 |

chapter 10 **Acid-Base Titrations** 191

| | |
|--|-----|
| Strong Acid versus Strong Base | 191 |
| Detection of the End Point: Indicators | 194 |
| Weak Acid versus Strong Base | 196 |
| Weak Base versus Strong Acid | 199 |
| Titration of Sodium Carbonate | 200 |
| Titration of Polyprotic Acids | 203 |
| Mixtures of Acids or Bases | 203 |
| Titration of Amino Acids | 205 |
| Kjeldahl Analysis | 206 |
| Preparation of Standard Base Solutions | 208 |
| Preparation of Standard Acid Solutions | 209 |
| Titrations in Nonaqueous Solvents | 210 |

chapter 11 **Precipitation and Complexometric Titrations** 219

| | |
|---|-----|
| Complexes: Formation Constants | 219 |
| Chelates: EDTA | 221 |
| EDTA Titration Curves | 224 |
| Detection of the End Point: Indicators | 225 |
| Fraction of Dissociating Species in Polyligand Complexes: β -Values | 228 |
| Effect of Acidity on Solubility of Precipitates | 230 |
| Effect of Complexation on Solubility | 232 |
| Precipitation Titrations | 233 |
| Other Experiments | 245 |

chapter 12 **Reduction-Oxidation Titrations** 249

| | |
|---|-----|
| Principles | 249 |
| Electrochemical Cells | 250 |
| The Nernst Equation | 255 |
| Calculation of the Equilibrium Constant of a Reaction | 258 |
| Titration Curves | 260 |
| Detection of the End Point | 263 |
| Formal Potential | 264 |
| Limitations of Electrode Potentials | 266 |
| Titrations Involving Iodine: Iodimetry and Iodometry | 266 |
| Titrations with Oxidizing Agents | 270 |
| Titrations with Reducing Agents | 273 |
| Preparation of the Analyte Solution | 273 |

chapter 13 Potentiometry and Potentiometric Titrations 287

| | |
|---|-----|
| Electrodes of the First Kind | 287 |
| Electrodes of the Second kind | 288 |
| Electrodes of the Third Kind | 290 |
| Redox Electrodes | 290 |
| Cells without Liquid Junction | 292 |
| Cells with Liquid Junction | 293 |
| Reference Electrodes: The Saturated Calomel Electrode | 295 |
| Measurement of Potential | 297 |
| Determination of Concentrations from Potential Measurements | 299 |
| The Residual Liquid Junction Potential | 300 |
| Accuracy of Direct Potentiometric Measurements | 300 |
| The Glass pH Electrode | 301 |
| Standard Buffers | 306 |
| Accuracy of pH Measurements | 306 |
| Measurements with the pH Meter | 308 |
| pH Measurement of Blood | 309 |
| pH Measurements in Nonaqueous Solvents | 310 |
| Ion-Selective Electrodes | 310 |
| Potentiometric Titrations (Indirect Potentiometry) | 318 |

chapter 14 Electrolytic Methods 333

| | |
|---------------------------------|-----|
| Electrogravimetry | 334 |
| Controlled-Potential Coulometry | 337 |
| Controlled-Current Coulometry | 339 |
| Voltammetry | 343 |
| Polarography | 347 |
| Anodic Stripping Voltammetry | 353 |
| Pulse Polarography | 354 |
| Amperometry | 356 |

chapter 15 Spectrometry 369

| | |
|--|-----|
| Interaction of Electromagnetic Radiation with Matter | 369 |
| Electronic Spectra and Molecular Structure | 376 |
| Infrared Absorption and Molecular Structure | 380 |
| Solvents for Spectrometry | 383 |
| Quantitative Calculations | 384 |
| Principles of Instrumentation | 389 |
| Types of Instruments | 396 |
| Spectrometric Error | 399 |
| Deviations from Beer's Law | 400 |
| Fluorometry | 403 |

chapter 16 Atomic Spectrometric Methods 419

| | |
|-------------------------------------|-----|
| Emission Spectroscopy | 419 |
| Flame Emission Spectrometry | 421 |
| Plasma Emission Spectrometry | 422 |
| Atomic Absorption Spectrophotometry | 423 |

chapter 17 Solvent Extraction 443

- The Distribution Coefficient 443
- The Distribution Ratio 444
- The Percent Extracted 445
- Solvent Extraction of Metals 446
- Analytical Separations 450
- Multiple Batch Extractions 452
- Countercurrent Distribution 453
- Solvent Extraction Experiments 456

chapter 18 Chromatographic Methods 459

- Principles 460
- Classification of Chromatographic Techniques 463
- Techniques of Column Chromatography 464
- ✓ Size Exclusion Chromatography 467
- Ion Exchange Chromatography 470
- Gas Chromatography 475
- High-Performance Liquid Chromatography 486
- Paper Chromatography 494
- Thin-Layer Chromatography 496
- Electrophoresis 499

chapter 19 Kinetic Methods of Analysis 515

- Kinetics 515
- Catalysis 517
- Enzyme Catalysis 520

chapter 20 Automation in the Laboratory 535

- Principles of Automation 535
- Automated Instruments: Process Control 536
- Automatic Instruments 538
- Semiautomatic Instruments 539
- The AutoAnalyzer 540
- The Centrifugal Analyzer 543
- Microprocessor-Controlled Instruments: "Smart" Instruments 546
- Computers in Analytical Chemistry 548

chapter 21 Clinical Chemistry 553

- The Composition of Blood 553
- Collection and Preservation of Samples 555
- Clinical Analysis 556
- Radioimmunoassay 557
- The Van Slyke Manometric Apparatus 565
- The Blood Gas Analyzer 567
- Trace Elements in the Body 567

| | | | |
|----------------------------|---|-----|-------------|
| <i>chapter 22</i> | Drug Analysis: Narcotics and Dangerous Drugs | 571 | |
| | Classification of Drugs | 571 | |
| | Gas Chromatography Screening | 574 | |
| | Thin-Layer Chromatography Screening | 577 | |
| | Spectrophotometric Methods of Measurement | 578 | |
| | | | |
| <i>chapter 23</i> | Pollution Analysis | 583 | |
| | Air Analysis | 583 | |
| | Water Analysis | 589 | |
| | | | |
| <i>appendix A</i> | Literature of Analytical Chemistry | 595 | |
| | | | |
| <i>appendix B</i> | Review of Mathematical Operations: | 599 | |
| | Exponents, Logarithms, The Quadratic Formula, and Calculators | | |
| | | | |
| <i>appendix C</i> | Balancing Reduction-Oxidation Reactions | 605 | |
| | | | |
| <i>appendix D</i> | Tables of Constants | 613 | |
| | Table D.1 Dissociation Constants for Acids | 613 | |
| | Table D.2 Dissociation Constants for Bases | 614 | |
| | Table D.3 Solubility Product Constants | 615 | |
| | Table D.4 Formation Constants for Some EDTA Metal Chelates | 616 | |
| | Table D.5 Some Standard and Formal Reduction Electrode Potentials | 617 | |
| | | | |
| <i>appendix E</i> | Safety in the Laboratory | 621 | |
| | | | |
| <i>appendix F</i> | Answers to Problems | 627 | |
| | | | |
| Index | | 631 | |
| | | | |
| Atomic and Formula Weights | | | Front Cover |
| Four-Place Logarithms | | | Back Cover |
