## Preface

xiii

- 1 Managerial Economics and Managerial Economists** **1**  
Key Concepts • What Is Ahead in This Chapter •  
Contributions of Managerial Economics • What Do  
Managerial Economists Do? • Seven Managerial Economists  
and What They Do • Economics, Management, and  
Decision Making • Problem Formulation • Naugatuck  
Candy Company • Problem Solving • Alternatives •  
Market Organization and Decision Making • Case Analysis  
in Managerial Economics • The Cases Themselves •  
Selected Readings • Questions, Problems, and Projects  
Case 1.1 Economics Function at General Telephone and  
Electronics Corporation
- 2 Numbers, Models, and Managerial Economics** **21**  
Key Concepts • What Is Ahead in This Chapter •  
Numerical Methods in Managerial Economics • Economic  
Model Building • Deciding Which Facts and Factors Are  
Relevant • Simple Economic Model • Selecting  
Quantifiable Factors • Aggregation • Intuition and Model  
Building • Uses of Models in Managerial Economics • UFO  
Model • Algebraic Model • Black-Eyed Peas Supply  
Function • Demand Function • Slope of the Demand  
Function • Solution of Black-Eyed Peas Problem • Onions

and the Cobweb Theorem • Making the Cobweb Work • Cobweb with Numbers • Solving the Cobweb • Cobweb Models as Dynamic Models • Time Path of Onion Prices • Another Economic Model of the Effect of Time: Cash Flows • Still Another Time-Cash-Flow Problem • Algebra of Time Cash Flows • Time-Series Analysis • Time-Series Model • Statistical Decision Model • Measuring the Consequences of Possible Action • Selecting a Decision Strategy • Bayesian Theory of Probability • Bayes' Rule and the Value of Sample Information • Revised Expected Value • Chapter Summary • Selected Readings • Questions, Problems, and Projects

### **3 Demand Analysis**

63

Key Concepts • What Is Ahead in This Chapter • What an Operational Approach to Demand Means • Demand Models: What Do We Know? • Time-Series Demand Model • Demand Function for Oranges in Grand Rapids, Michigan • Own-Price Elasticity • Practical Applications of Elasticity • Empirical Estimates • Are There Meaningful Differences in Own-Price Elasticities? • Cross Elasticity • Total Revenue, Average Revenue, and Marginal Revenue • Consumer Surplus • Income-Expenditure Demand Model: Survey of Consumer Expenditures • Housing Demand and the Property Tax • Arc Elasticity Formula for Income Elasticity • Income Demand Model for Food • Engel's Demand Model for Food • Chart of Income-Elasticity Relationships • Equivalent Income • Revealed Preference • Inferences from Revealed Preference • Price Effects, Income Effects, and Substitution Effects • Index Numbers • Index Numbers in Use • Market Demand • Product-as-a-Variable Demand Model • Chapter Summary • Selected Readings • Questions, Problems, and Projects

Case 3.1 Boston & Maine Railroad

Case 3.2 Harris Pine Mills Company

### **4 Statistical and Econometric Analysis of Demand**

121

Key Concepts • What Is Ahead in This Chapter • What Is a Hypothesis? • What Is a Statistical Analysis? • What Is Econometric Analysis? • Regression Model of Demand •

Statement of the Linear Regression Model • What Is a Variance? • Model Estimation • Selecting Parameters • Absence of Bias • Efficiency • Consistency • What Is Accuracy? • Confidence Intervals • Testing a Hypothesis • t Distribution • Variance and Correlation • United States Auto Sales: An Income Demand Model • Linear Multiple Regression Models • Naugatuck Candy Company: Solving a Multiple Regression Problem • Retail Sales, Income, and Unemployment • Projecting United States Consumer Demand • Demand for Radio and Television Receivers, Records, and Musical Instruments • Houthakker and Taylor Food Demand Model • Conflict with Established Demand Theory • Problems with Regression Models • Dummy Variables • Urban Housing Demand in Pittsburgh • Identification • Chapter Summary • Selected Readings • Questions, Problems, and Projects

Case 4.1 Demand for Bus Transit Service in Milwaukee

Case 4.2 Consumer Food Demand in Ghana

Case 4.3 Demand for Network Television Advertising

## **5 Role of Costs in Managerial Decision Making**

**163**

Key Concepts • What Is Ahead in This Chapter • Measurement of Cost • Opportunity Costs • Social Costs • Costs of Production • Cost Definitions • SB Athletic Products Company • Total Cost Variations • Marginal Costs • Relationship between Marginal and Average Total Costs • Marginal and Average Cost Relationships at SB Athletic Products Company • Analysis of Production Costs at Unitechnology, Inc. • Change in Input Prices • Marginal Rate of Substitution • Meaning of Production Process and Scale Changes • Capacity • Planning Context: Meaning of Short Run and Long Run • Law of Variable Proportions • Diminishing Returns • Changes in Scale • Cost Functions • Economic Supply • External Economies • Long-Run Costs • Long-Run Planning for Unitechnology, Inc. • Long-Run Cost Curves • Externalities • Measuring Economies of Scale • Empirical Analysis of Long-Run Costs • Statistical Cost Functions • Rail Cost Functions • Johnston's Review of Cost Functions • Walters' Review of Cost Study Results

- Learning Curve • Application of the Learning Curve to Prices and Costs • Some Possible Pitfalls in Learning Curve Analysis • Other Applications of Learning Curve • Examples of Learning Curves in Use • Tashua Corporation and Financial Planning • Chapter Summary • Selected Readings • Questions, Problems, and Projects

Case 5.1 Housing Supply in Springfield, Massachusetts, in October 1972

Case 5.2 Merritt Aircraft Company

## **6 Production**

217

- Key Concepts • What Is Ahead in This Chapter • Characteristic of Production Functions • A Production Process • A Production Function Map • Selection of an Efficient Process • Profit Maximization • The Marginal Rate of Substitution • Empirical Implications of the Production Function • Homogeneous Production Functions • The Cobb-Douglas Production Function • Constant Elasticity of Substitution Production Function • The Leontieff Production Function • Empirical Cobb-Douglas Production Functions • Technological Change • Linear Programming • Implicit Values • Minimizing Costs • Solving Linear Programming Problems • Other Production Optimization Techniques • Chapter Summary • Selected Readings • Questions, Problems, and Projects

Case 6.1 Economies of Scale and Organizational Efficiency in Banking

Case 6.2 Forecasting Agricultural Supply Response in France

Case 6.3 Canadian Plywood Manufacturing

Case 6.4 Acme Plastics

## **7 Managerial Price Decisions**

285

- Key Concepts • What Is Ahead in This Chapter • The Key Elements of the Pricing Decision • The Dimensions of a Price • How Important Is the Price? • Objectives in Pricing • Competitive Structure of the Market • The Business Environment • When Must Pricing Decisions Be Made? • Pricing Rules • Profit Maximizing Rules for Price Decisions • Imperfect Competition and Monopoly • The  $MR = MC$

Pricing Rule in Pure Competition • Oligopoly Pricing • Dominant Firm Approach to Oligopoly • Cartel and Oligopolistic Pricing Agreements • A Summary Comment on the  $MR = MC$  Pricing Rule • Gross Revenue Maximizing Pricing Rule • Pricing Rule for Maximizing the Value of the Investment in a Firm • Satisficing Rules and Price Decisions • Firm Survival Pricing • Putney Corporation: Using Break-Even Analysis to Set Prices • Nonlinear Break-Even Analysis • Monopoly Prices and Price Discrimination • Comparison between Competitive and Monopoly Pricing • Shadow Prices • Transfer Prices • Price Lining • When the Price System Does Not Work • Chapter Summary • Selected Readings • Questions, Problems, and Projects

Case 7.1 Deregulating Natural Gas

Case 7.2 Memorial Hospital

## **8 Profits, Managerial Effectiveness, and Enterprise**

**335**

Key Concepts • What Is Ahead in This Chapter • Questions about Profits • Facts about Profits • How High Are Profits? • Measurement of Profits • Purposes of Economic Theories of Profit • Marginal Productivity and Profit • Uncertainty • What Is a Productive Resource? • Compensation Theory of Profits • Monopoly Theory of Profits • Schumpeter's Theory of Monopoly Profits • Exploitation Theory of Profits • Profits and Profitability in the Soviet Union • Risk Theory of Profit • Romantic Theory of Profits • Frigitronics: A Case Study in Profit Analysis • Changes in Financial Position • What Is a Loss? • Wiltek, Inc.: Case Study in Loss Management • Anomalous Position of Some Nonprofit Organizations • Do Governments Lose Money? Why? • Allocative Role of Profit in the United States • Undesirable Social Outcomes from the Profit System • Chapter Summary • Selected Readings • Questions, Problems, and Projects

Case 8.1 United Nuclear Corporation

Case 8.2 Connecticut Natural Gas Corporation

## **9 Market Structure, Market Power, and Antitrust**

**379**

Key Concepts • What Is Ahead in This Chapter • State of

the Argument • Competition • Concentration • Changes in Concentration in the United States • Economic Size • The Fortune 500 • Determinants of Market Structure • Evidence on Concentration, Size, and Profitability • Market Power and Market Performance • Minimum Optimal Scale • Monopoly Capitalism • Antitrust Policy • Attitudes toward Antitrust • How Big Should a Firm Be? • Structural Changes • Effect of Antitrust Laws • Changes in Economic Theory • Key Antitrust Cases • Per Se Violations • The Clayton Act • Problems in Antitrust Enforcement • Price Discrimination • Conglomerate Mergers • Potential Competition • Limits of Antitrust • Chapter Summary • Selected Readings • Questions, Problems, and Projects

Case 9.1 Chartering, Branching, and the Concentration Problem

Case 9.2 Economic Concentration—Some Further Observations

Case 9.3 Forced Divestiture in Oil?

<b>10 Forecasting: Making the Future Part of Today's Decisions</b>	<b>429</b>
Key Concepts • What Is Ahead in This Chapter •	
Relationship Between Microeconomic and Macroeconomic Forecasting • Approaches to Economic Forecasting •	
Forecasting with Large-Scale Econometric Models • A Simple Econometric Forecasting Model • Whys and Wherefores of Econometric Forecasting • A Choice Among Models: Keynes vs. Friedman • Timing in Econometric Models • Accuracy in Forecasting • Input-Output Forecasting • Input-Output Structure • Comparison of I/O with Econometric Forecasting • Testing with Sensitivity in I/O • Other Uses of I/O • Indicator Approach to Forecasting • Composite Indicator Series • Using the CLI as a Forecast Model • Technological Forecasting • Delphi Forecasts • Long-Wave Forecasting • Microanalytic Simulation • Arguments Favoring a Microanalytic Strategy • MASS—A Microanalytic Simulation System • Applications of Microanalytic Forecasting • Annual Review of Forecasts • Chapter Summary • Selected Readings • Questions, Problems, and Projects	

Case 10.1 Charleroi County Savings Bank

Case 10.2 The 1976 RCA Forecast

## **11 Capital Budgeting**

**481**

Key Concepts • What Is Ahead in This Chapter • Interstate Acromatics, Inc. • Long-Run Costs and Capital Budgeting • Cash-Flow Analysis and Capital Budgeting • Depreciation • Discounted Cash Flow • Financial Evaluation of Projects • Payback • Payback Project Acceptance Rule • Criticisms of Payback • Project Dependence and Independence • NPW as an Investment-Choice Criterion • Use of the Net Present Worth Criterion • Marginal Cost of Capital • NPW as a Choice Criterion: A Supply-Demand Example • Internal Rate of Return • Project Acceptance Rules Using IRR • Comparison of NPW and IRR • No Positive IRR • Two or More IRRs • Economic Life of Capital Projects • Selection of Priorities • Sequential Decision Theory • Linear Programming • Integer Programming • Markov Chain Analysis • Uncertainty in Capital Budgeting • Sensitivity Analysis • Case of Unknown Probabilities • Minimax Principle • Minimin Principle • Regret Principle • Chapter Summary • Selected Readings • Questions, Problems, and Projects

Case 11.1 The Federal Executive Institute and Managerial Training Center at Charlottesville, Virginia

Case 11.2 The 1976 Capital Budget for Moore McCormack Resources, Inc.

## **12 Benefit/Cost Analysis**

**537**

Key Concepts • What Is Ahead in This Chapter • Why Benefit/Cost Analysis Is Used • Benefit/Cost Analysis and Optimization • Is an Economic Activity Worth Doing? • Social Accounting Prices • Indirect Effects • Benefit/Cost Analysis of the Lost River Project • Comparisons of Benefits and Costs • Mexican Road Projects • Transportation Planning in Ecuador: Calculating Payback • Systems Analysis of an Expansion Decision • Assessment of Federal Housing Subsidy Programs • Equity • Impact • Efficiency • Findings and Conclusions about Federal Housing

Programs • Chapter Summary • Selected Readings •  
Questions, Problems, and Projects

Case 12.1 Comparisons of Estimated Costs of Motor Vehicle  
Accidents

Case 12.2 Andrews University Elementary School

### **13 Location Analysis**

Key Concepts • What Is Ahead in This Chapter • Basic  
Elements of the Location Decision • Market Potential •  
Market Density • Demand Conditions • Market  
Organization • Nature of Product • Decision Rules for  
Plant Location • Optimal Plant Location with Infinite  
Transport Network • Linear Programming in Location  
Analysis • Fan Hill Distributors • Cost-Minimization  
Location Models • Market-Area Competition Models •  
Pattern of Economic Activity in a City • Employment  
Trends in Philadelphia • Philadelphia Fed Location Model  
• Results of the Philadelphia Fed Location Model •  
Conclusions about the Philadelphia Model • Economic-Base  
Analysis • Minimum or Threshold Requirements •  
Location Quotients • Strategy of Location • Critique on  
Location and Relocation • Chapter Summary • Selected  
Readings • Questions, Problems, and Projects

Case 13.1 Federal Assistance to Economically Distressed  
Areas

Case 13.2 Huyck: A Company That Moved South

### **Index**
