<i>Preface</i>	vii
<i>About the Authors</i>	xiii
<i>List of Figures</i>	xxiii
<i>List of Tables</i>	xxix
<i>List of Algorithms</i>	xxxix
1. Introduction: Video Processing, Granular Computing, Rough Sets, Deep Learning and IoT	1
1.1 Introduction . . . . .	1
1.2 Video Computing . . . . .	5
1.2.1 Video Tracking . . . . .	6
1.2.2 Trustability Measure of Tracking . . . . .	10
1.2.3 Object Recognition from Scene . . . . .	10
1.2.4 Video Understanding . . . . .	11
1.3 Granular Computing . . . . .	13
1.3.1 Granulation . . . . .	13
1.3.2 Information Granules . . . . .	14
1.4 Rough Sets . . . . .	15
1.4.1 Definitions . . . . .	15
1.4.2 Reduct and Core . . . . .	17
1.4.3 Partial Dependency in Knowledge Base . . . . .	17
1.4.4 Indiscernibility Matrix . . . . .	18
1.4.5 Neighborhood Rough Sets . . . . .	18

1.4.6	Rough Sets and Image Processing . . . . .	19
1.4.7	Rough Sets and Uncertainty Modeling . . . . .	22
1.4.8	Rough Entropy . . . . .	24
1.5	Deep Learning . . . . .	26
1.5.1	Deep Learning and Image Processing . . . . .	27
1.5.2	Deep Learning Models . . . . .	27
1.6	Internet of Things (IoT) . . . . .	29
1.6.1	IoT and Video Processing . . . . .	29
1.6.2	IoT: Features and Benefits . . . . .	30
1.6.3	IoT Applications . . . . .	31
1.7	Scope and Organization of the Book . . . . .	32
	Bibliography . . . . .	36
2.	Partial Supervised Tracking . . . . .	45
2.1	Introduction . . . . .	45
2.2	Popular Approaches for Partially Supervised Tracking . . . . .	46
2.3	Rough Entropy-based Spatial Segmentation . . . . .	49
2.3.1	Formation of Granules . . . . .	49
2.3.2	Algorithm for Optimal Thresholding for Spatial Segmentation . . . . .	51
2.4	Background Estimation-based Temporal Segmentation . . . . .	52
2.4.1	Three-point Estimation Technique . . . . .	52
2.5	Target Localization and Tracking: Algorithm . . . . .	54
2.6	Experimental Results . . . . .	55
2.6.1	Results of Spatial Segmentation . . . . .	56
2.6.2	Results of Temporal Segmentation . . . . .	59
2.6.3	Results of Reconstruction . . . . .	59
2.6.4	Results of Tracking . . . . .	60
2.7	Conclusions and Discussions . . . . .	63
	Bibliography . . . . .	64
3.	Unsupervised Tracking . . . . .	67
3.1	Introduction . . . . .	67
3.2	Popular Methods for Unsupervised Tracking . . . . .	69
3.3	Neighborhood Granular Rough Rule-base and Flow Graph for Unsupervised Tracking (NRBFG) . . . . .	70

3.3.1	Formation of Neighborhood Granules . . . . .	71
3.4	Rough Rule-base and Unsupervised Tracking . . . . .	75
3.4.1	Acquiring Features for Initial Unsupervised Labeling . . . . .	75
3.4.2	Rule-base in Pixel Level . . . . .	76
3.4.3	Rule-base in Granular Level . . . . .	78
3.5	Adaptive Rule-base: A Granular Flow Graph Approach . . . . .	79
3.5.1	Information Flow Graph . . . . .	79
3.5.2	Flow Graph in Video: Relevance and Issues . . . . .	80
3.5.3	Expected Flow Graph . . . . .	83
3.5.4	Mutual Dependency Between Flow Graphs . . . . .	84
3.6	Experimental Results . . . . .	87
3.6.1	Results of Tracking . . . . .	88
3.6.2	Comparisons . . . . .	91
3.7	Conclusions and Discussions . . . . .	94
	Bibliography . . . . .	95
4.	Unsupervised Occlusion Handling . . . . .	99
4.1	Introduction . . . . .	99
4.2	Related Work on Handling Overlapping and Occlusion . . . . .	101
4.3	Unsupervised Methodology for Handling Overlapping and Occlusion . . . . .	103
4.3.1	Overview . . . . .	103
4.3.2	Formation of Spatio-color Neighborhood Granules . . . . .	104
4.3.3	NRS Filter for Unsupervised Object Estimation . . . . .	104
4.3.4	Performance Measure of NRS Filter . . . . .	107
4.3.5	Temporal Neighborhood Granules and Location Estimation . . . . .	107
4.3.6	Roughness in Object Approximation . . . . .	109
4.3.7	Intuitionistic Entropy . . . . .	110
4.4	Algorithm for Tracking . . . . .	115
4.5	Experimental Results . . . . .	115
4.5.1	Selection of Parameters and Initial Assumptions . . . . .	117

4.5.2	Effectiveness of Unsupervised Labeling and Estimation . . . . .	118
4.5.3	Results of Tracking . . . . .	120
4.6	Conclusions and Discussions . . . . .	125
	Bibliography . . . . .	126
5.	Trustability Measures of Tracking Algorithms . . . . .	129
5.1	Introduction . . . . .	129
5.2	Different Performance Evaluation Metrics . . . . .	131
5.3	Indices Without Ground Truth Information . . . . .	132
5.3.1	RGB-based Evaluation Indices . . . . .	132
5.3.2	Tracking Indices With Depth Feature . . . . .	137
5.4	Characteristic Differences Among the Unsupervised Measures . . . . .	139
5.4.1	Effectiveness of RGB-based Measures: Evaluation of Mis-tracked Frames . . . . .	140
5.4.2	Validation of Depth-based Measures . . . . .	147
5.5	Trustability Measure of Different Methods Under Different Scenarios . . . . .	150
5.5.1	Trustability for Single Object Tracking . . . . .	151
5.5.2	Trustability for Multiple Object Tracking . . . . .	155
5.5.3	Trustability for Tracking with Occlusion/Overlapping . . . . .	158
5.6	Conclusions and Discussions . . . . .	159
	Bibliography . . . . .	159
6.	Object Recognition and Deep Learning . . . . .	163
6.1	Introduction . . . . .	163
6.2	Granulated Deep Learning . . . . .	167
6.2.1	Granulation Techniques . . . . .	167
6.2.2	Conventional Convolution Neural Network . . . . .	168
6.2.3	Granulated Deep Learning: Concepts, Characteristics and Relevance . . . . .	169
6.2.4	Granulated Deep Learning: Object Tracking and Recognition . . . . .	171

6.3	Experimental Results . . . . .	173
6.3.1	Results of Moving Object Detection and Tracking . . . . .	175
6.3.2	Comparative Study . . . . .	175
6.4	Z-number-based Scene Description . . . . .	180
6.4.1	Formulation of Measures . . . . .	181
6.4.2	Significance of Z-number-based Measure . . . . .	184
6.5	Conclusions and Discussions . . . . .	186
	Bibliography . . . . .	188
7.	Video Conceptualization . . . . .	191
7.1	Introduction . . . . .	191
7.2	Related Work . . . . .	192
7.3	Video Conceptualization and IoT Architecture . . . . .	193
7.3.1	Formation of Two-layered Motion Granules . . . . .	196
7.3.2	Object-Background as Rough Sets . . . . .	198
7.3.3	Motion Entropy . . . . .	201
7.4	Conceptualizing the Video by Estimating the Moving Patterns of Objects and Precognized Events . . . . .	204
7.5	Results and Discussions . . . . .	207
7.5.1	Preliminary Assumptions and Parameter . . . . .	207
7.5.2	Experimental Results in PC . . . . .	207
7.5.3	Comparative Results . . . . .	212
7.5.4	Experimental Results in IoT . . . . .	213
7.6	Conclusions and Discussions . . . . .	216
	Bibliography . . . . .	217
	<i>Index</i> . . . . .	221
