About the Editors

Dany Laveault is a Professor Emeritus (2013) at the Faculty of Education, University of Ottawa, Canada. He served the Faculty as Vice Dean for Research from 1998 to 2002. He has also been an invited professor at Université Libre de Bruxelles four times since 1991. In 1995, he was awarded the Benoît Poulin Prize for outstanding contributions in educational evaluation. From 1993 to 2001, he directed the international journal *Measure of Evaluation in Education*. From 2004 to 2015, he acted as an expert consultant for the Educational Quality and Accountability Office of Ontario (EQAO) and more recently for the Ministry of Education of Quebec. His writings in French and English have been published in over fifty scholarly journals and books and have garnered him international recognition as an expert in educational measurement and evaluation. The Faculty of Education granted him the Award for Excellence in Research in 2012. In 2014, DeBoeck released the third edition of his book on test theories. His research has focused on how assessment practices may be improved to develop students’ self-regulation skills, including student self-evaluation. He has published several papers on the role of student self-assessment in learning and on teachers’ professional judgment as it relates to the norms and standards of the teaching profession regarding classroom assessment. http://dir.univ-wroclawa.pl/faculte/professeurs/hof-detail_prof?id=100631.

Linda Allal is a Professor Emerita in the Faculty of Psychology and Education Sciences at the University of Geneva, Switzerland. She obtained her Ph.D. in educational psychology from Michigan State University. In a career spanning 33 years as professor at the University of Geneva, she held positions as Chair of the Education Sciences department and as Associate Dean of the Faculty. She served as President of the Association pour le développement des méthodologies d’évaluation-Europe (Europe Association for the Development of Evaluation Methodologies) and as European editor of its journal of this association. After her initial work on generalizability theory and its applications in educational measurement, she oriented her research primarily in two directions: the role of
