CONTENTS

Introduction

What is physics? 2 ☐ The classical branches of physics 2 ☐ The relation of physics to other sciences 3 ☐ The experimental method 3

1 Structure of Matter

Introduction 6 ☐ Particles 6 ☐ Atoms 8 ☐ Molecules 11 ☐ Matter in bulk 13 ☐ Interactions 16

2 Measurement and Units

Introduction 18 ☐ Measurement 18 ☐ Fundamental quantities 18 ☐ Fundamental units 19 ☐ Density 22 ☐ Plane angles 23

3 Vectors

Concept of direction 27 ☐ Scalars and vectors 27 ☐ Addition of vectors 29 ☐ Components of a vector 31 ☐ Addition of several vectors 32 ☐ Application to kinematic problems 32 ☐ Scalar product 34 ☐ Vector product 35 ☐ Vector representation of surfaces 37

4 Forces

Introduction 41 ☐ Composition of concurrent forces 41 ☐ Torque 42 ☐ Torque of several concurrent forces 43 ☐ Composition of forces applied to a rigid body 44 ☐ Composition of parallel forces 45 ☐ Center of mass 46 ☐ Statics. Equilibrium of a particle 48 ☐ Statics. Equilibrium of a rigid body 49

PART 1 PARTICLES

5 Kinematics

Introduction 59 ☐ Rectilinear motion: velocity 59 ☐ Rectilinear motion: acceleration 61 ☐ Vector representation of velocity and acceleration in rectilinear motion 62 ☐ Some special motions 63 ☐ Curvilinear motion: velocity 65 ☐ Curvilinear motion: acceleration 67 ☐ Motion with constant acceleration 69 ☐ Circular motion: angular velocity 71 ☐ Circular motion: angular acceleration 73 ☐ Velocity and acceleration in circular motion 73

6 Relative Motion

Introduction 80 ☐ Relative velocity 80 ☐ Uniform relative translational motion. The Galilean transformation 83 ☐ Uniform relative rotational motion 85 ☐ Motion relative to the earth 87 ☐ The Lorentz transformation 90 ☐ Lorentz transformation of velocities and accelerations 93 ☐ Consequences of the Lorentz transformation 93

Dipindai dengan CamScanner

7 Force and Momentum

Introduction 102 ☐ The law of inertia 102 ☐ Linear momentum 104 ☐ Principle of conservation of momentum 104 ☐ Redefinition of mass 107 ☐ Newton's second and third laws; concept of force 108 ☐ Units of force 110 ☐ Frictional forces 112 ☐ Frictional forces in fluids 115 ☐ Systems with variable mass 116 ☐ Curvilinear motion 118 ☐ Angular momentum 120 ☐ Central forces 121

8 Work and Energy

Introduction 130 ☐ Work 131 ☐ Power 132 ☐ Units of work and power 133 ☐ Kinetic energy 135 ☐ Units of energy 137 ☐ Work of a constant force 137 ☐ Potential energy 138 ☐ Relation between force and potential energy 140 ☐ Conservation of energy of a particle 141 ☐ Discussion of potential energy curves 142 ☐ Nonconservative forces 144 ☐ Recapitulation 145

9 Oscillatory Motion

Introduction 151 ☐ Kinematics of simple harmonic motion 151 ☐ Force and energy in simple harmonic motion 153 ☐ Basic equation of simple harmonic motion 154 ☐ The simple pendulum 155 ☐ Superposition of two SHM: Same direction, same frequency 157 ☐ Superposition of two SHM: Same direction, different frequency 159 ☐ Superposition of two SHM: Perpendicular directions 160 ☐ Coupled oscillators 163 ☐ Anharmonic oscillations 165 ☐ Damped oscillations 166 ☐ Forced oscillations 168 ☐ Fourier analysis of periodic motion 173

10 Systems of Particles

Introduction 179 ☐ Motion of the center of mass of an isolated system of particles 179 ☐ Motion of the center of mass of a system of particles subject to external forces 180 ☐ Reduced mass 185 ☐ Angular momentum of a system of particles 188 ☐ Internal and orbital angular momentum 189 ☐ Kinetic energy of a system of particles 190 ☐ Conservation of energy of a system of particles 191 ☐ Total energy of a system subject to external forces 192 ☐ Internal energy of a system of particles 193 ☐ Binding energy of a system of particles 194 ☐ Collisions 195 ☐ Fluid motions 200

11 Dynamics of a Rigid Body

Introduction 210 ☐ Angular momentum of a rigid body 210 ☐ Calculation of the moment of inertia 213 ☐ Equation of motion for rotation of a rigid body 217 ☐ Physical pendulum 220 ☐ Torsion pendulum 221 ☐ Gyroscopic motion 224

12 High-Energy Dynamics

Introduction 234 ☐ Classical principle of relativity 234 ☐ Special principle of relativity 236 ☐ Momentum 237 ☐ Energy 238 ☐ High-energy processes 243

13 Statistical Mechanics

Introduction 253 ☐ Temperature 253 ☐ Statistical equilibrium: The Maxwell-Boltzmann distribution law 254 ☐ Energy and velocity distribution of the molecules in a gas 257 ☐ Equation of state of a gas 259 ☐ Many-particle systems: work 262 ☐ Many-particle systems: heat 265 ☐ Reformulation of the principle of conservation of energy for many-particle systems: The first law of thermodynamics 266 ☐ Heat capacity 268 ☐ Entropy 272 ☐ Relation between entropy and heat 272 ☐ The trend toward equilibrium: The second law of thermodynamics 275

14 Transport Phenomena

Introduction 282 ☐ Molecular diffusion: Fick's law 282 ☐ Thermal conduction: Fourier's law 287 ☐ Viscosity 290 ☐ Mean free path, collision frequency, and collision cross section 292 ☐ Molecular theory of transport phenomena 294

PART 2 INTERACTIONS AND FIELDS

15 Gravitational Interaction

Introduction 304 ☐ The law of gravitation 305 ☐ Inertial and gravitational mass 309 ☐ Gravitational potential energy 310 ☐ Relation between energy and orbital motion 310 ☐ Gravitational field 315 ☐ Gravitational potential 316 ☐ Gravitational field due to a spherical body 318 ☐ The principle of equivalence 323 ☐ Gravitation and intermolecular forces 325

Dipindai dengan CamScanner

16 Electric Interaction

Introduction 331 ☐ Electric charge 332 ☐ Coulomb's law 333 ☐ Units of charge 334 ☐ Electric field 335 ☐ Electric field of a point charge 337 ☐ The quantization of electric charge 340 ☐ Principle of conservation of charge 342 ☐ Electric potential 343 ☐ Energy relations in an electric field 348 ☐ Electric current 349

17 Magnetic Interaction

Introduction 357 ☐ Magnetic force on a moving charge 358 ☐ Motion of a charged particle in a uniform magnetic field 359 ☐ Motion of a charged particle in a nonuniform magnetic field 362 ☐ Examples of motion of charged particles in a magnetic field 366 ☐ Magnetic force on an electric current 371 ☐ Magnetic torque on an electric current 372 ☐ Magnetic field produced by a closed current 374 ☐ Magnetic field of a rectilinear current 376 ☐ Magnetic field of a circular current 377 ☐ Magnetic field of a moving charge (nonrelativistic) 379 ☐ Electromagnetism and the principle of relativity 380 ☐ Forces between currents 382

18 Electric Structure of Atoms

Introduction 391 ☐ Electrolysis 391 ☐ The nuclear model of the atom 393 ☐ Bohr's theory of the atom 395 ☐ Quantization of angular momentum 398 ☐ Electron spin 401 ☐ Spin-orbit interaction 402 ☐ Electron shells in atoms 404 ☐ Electrons in molecules 408 ☐ Electrons in solids 410 ☐ Conductors, semiconductors, and insulators 411

19 Static Electromagnetic Field

Introduction 419 ☐ Flux of a vector field 419 ☐ Line integral and circulation of a vector field 419

I The Electric Field
Electromotive force 421 ☐ Gauss' law for the electric field 422 ☐ Properties of a conductor placed in an electric field 427 ☐ Electric polarization of matter 429 ☐ The polarization vector 430 ☐ Electric displacement 432 ☐ Electric susceptibility and permittivity 433 ☐ Electric capacitance. Capacitors 434 ☐ Energy of the electric field 437

II The Magnetic Field
Ampere's law for the magnetic field 439 ☐ Magnetic flux 443 ☐ Magnetization of matter 443 ☐ The magnetization vector 445 ☐ The magnetizing field 446 ☐ Magnetic susceptibility and permeability 448

20 Time-Dependent Electromagnetic Fields

Introduction 455 ☐ Faraday-Henry law 455 ☐ Electromagnetic induction due to relative motion of conductor and magnetic field 459 ☐ Electromagnetic induction and the principle of relativity 461 ☐ Self induction 462 ☐ Energy of the magnetic field 464 ☐ Coupled circuits 466 ☐ The principle of conservation of charge 468 ☐ Ampere-Maxwell law 469 ☐ Maxwell's equations 471

21 Electric Circuits

Introduction 477 ☐ Ohm's law 477 ☐ Electric power 479 ☐ Combination of resistors 479 ☐ Direct current circuits 481 ☐ Methods for calculating the currents in an electric network 482 ☐ Establishment and decay of a current in a circuit with self-inductance 484 ☐ Charge and discharge of a capacitor 486 ☐ Free electrical oscillations 488 ☐ Forced electrical oscillations. Alternating-current circuits 490 ☐ Application of the method of rotating vectors to ac electric circuits 492 ☐ Non-ohmic conductors 495

22 The Strong and Weak Interactions

Introduction 503 ☐ The nucleus 503 ☐ Properties of the nucleus 504 ☐ Nuclear binding energy 505 ☐ Nuclear forces 506 ☐ The shell model 508 ☐ Radioactive decay 509 ☐ The law of radioactive decay 513 ☐ Nuclear fission 514 ☐ Nuclear fusion 516 ☐ Fundamental particles 517

PART 3 WAVES

23 Wave Motion

Introduction 528 ☐ Description of wave motion 529 ☐ The general equation of wave motion 532 ☐ Elastic waves in a solid rod and in a spring 533 ☐

Dipindai dengan CamScanner

Pressure waves in a gas column 536 ☐ Transverse waves in a string 537 ☐ Transverse elastic waves in a bar 540 ☐ Surface waves in a liquid 541 ☐ What propagates in wave motion? 542 ☐ Waves in two and three dimensions 544 ☐ Spherical waves in a fluid 546 ☐ Group velocity 548 ☐ The Doppler effect 550 ☐ Sound, acoustics 552

24 Electromagnetic Waves

Introduction 558 ☐ Plane electromagnetic waves 558 ☐ Energy and momentum of an electromagnetic wave 562 ☐ Radiation from oscillating dipoles 564 ☐ Radiation from an accelerated charge 568 ☐ Propagation of electromagnetic waves in matter: dispersion 572 ☐ Doppler effect in electromagnetic waves 575 ☐ The spectrum of electromagnetic radiation 578

25 Interaction of Electromagnetic Radiation with Matter

Introduction 583 ☐ Emission of radiation by atoms, molecules, and nuclei 583 ☐ Absorption of electromagnetic radiation by atoms, molecules, and nuclei 584 ☐ Scattering of electromagnetic waves by bound electrons 585 ☐ Scattering of electromagnetic radiation by a free electron. Compton effect 587 ☐ More about photons: The photolectric effect 592 ☐ Stationary states 594 ☐ Experimental evidence of stationary states 598 ☐ Interaction of radiation with matter 599 ☐ Atomic spectra 601 ☐ Molecular spectra 604 ☐ Nuclear spectra 607 ☐ Blackbody radiation 608

26 Reflection, Refraction, and Polarization

Introduction 615 ☐ Malus' theorem 615 ☐ Reflection and refraction of plane waves 617 ☐ Reflection and refraction of spherical waves 620 ☐ Reflection and transmission of transverse waves at the point where two strings of different materials are joined 622 ☐ Reflection and refraction of electromagnetic waves 624 ☐ Propagation of electromagnetic waves in an anisotropic medium 626 ☐ Dichroism 631 ☐ Double refraction 631 ☐ Optical activity 635 ☐ Reflection and refraction at metallic surfaces 638

27 Wave Geometry

Introduction 644 ☐ Reflection at a spherical surface 644 ☐ Refraction at a spherical surface 650 ☐ Lenses 652 ☐ Optical instruments 657 ☐ The prism 660 ☐ Dispersion 661 ☐ Chromatic aberration 662

28 Interference

Introduction 669 ☐ Interference of waves produced by two synchronous sources 669 ☐ Interference of several synchronous sources 673 ☐ Standing waves in one dimension 677 ☐ Standing electromagnetic waves 681 ☐ Standing waves in two dimensions 683 ☐ Standing waves in three dimensions: Resonating cavities 686

29 Diffraction

Introduction 697 ☐ Huygens' principle 697 ☐ Fraunhofer diffraction by a rectangular slit 699 ☐ Fraunhofer diffraction by a circular aperture 702 ☐ Fraunhofer diffraction by two equal, parallel slits 703 ☐ Diffraction gratings 705 ☐ Fresnel diffraction 708 ☐ Scattering 710 ☐ X-ray scattering by crystals 711

30 Quantum Mechanics

Introduction 720 ☐ Particles and fields 720 ☐ Scattering of particles by crystals 721 ☐ Particles and wave packets 723 ☐ Heisenberg's principle 724 ☐ Illustrations of Heisenberg's principle 725 ☐ The uncertainty relation for time and energy 727 ☐ Stationary states and matter field 727 ☐ Wave function and probability density 730 Schrödinger's equation 731

Appendix Mathematical Relations

Trigonometric relations 737 ☐ Logarithms 738 ☐ Power expansions 740 ☐ Basic derivatives and integrals 740 ☐ Table of natural trigonometric functions 741 ☐ Table of common logarithms 742 ☐ Table of exponential functions 743

Answers to Odd-Numbered Problems 744
