Table of Normal Laboratory Values, ix

About the Author, xi

Dedication, xiii

Acknowledgments, xv

Preface, xvii

Introduction, xix

How the book should be used and understood, xxi

1 Skin and Soft Tissue Infections, 1

Case 1.1 Soft tissue infection following traumatic aquatic exposure, 1

Case 1.2 Soft tissue infection of the hand and wrist in an 81-year-old man, 6

Case 1.3 A 41-year-old Caucasian female with right arm swelling, 12

Case 1.4 A 24-year-old female with fever and arm swelling, 15

Case 1.5 A 72-year-old male with necrotic soft tissue elbow infection, 16

Case 1.6 A 37-year-old man with severe body aches and fever, 18

2 Fever of Unknown Origin and Drug-Induced Fever, 25

Case 2.1 Hypersensitivity masquerading as sepsis, 25

Case 2.2 A psychiatric patient with HIV infection and fever, 32

Case 2.3 A hypertensive patient with 2 months of fever and chills, 36

Brief review and discussion of drug-induced fever, 38

Lessons learned from these two cases, 40

3 Dermatologic Manifestations of Infectious and Non-infectious Diseases, 41

Case 3.1 A 45-year-old patient referred for "persistent shingles", 41

Case 3.2 A 39-year-old female with fever and acute rash illness, 46

Case 3.3 A 45-year-old female with subacute rash illness for 2 weeks, 50

Case 3.4 An 82-year-old man with a chronic non-healing elbow wound, 55

4 Diseases Acquired Through Close Contact with Animals, 61

Case 4.1 A 10-month-old child with "worms", 61

- Case 4.2 Infectious complication of cat scratch, 67
- Case 4.3 A young man with acute left arm lymphadenopathy, 72
- 5 Travel-associated Blood-borne Parasitic Infection, 77**
 - Case 5.1 A 15-year-old adolescent male with fever and thrombocytopenia, 77
 - Case 5.2 A 23-year-old Caucasian male with fever and chills, 81
 - Case 5.3 A 57-year-old male with acute-onset fever and chills, 83
 - Comparison of the characteristics of five patients with malaria seen between 1998 and 2015, 86
- 6 Gulf Coast Tick Rash Illness, 93**
 - Case 6.1 Woman with rash and prolonged eschar following a tick bite, 93
 - Case 6.2 A 58-year-old male with generalized body aches and fever, 97
- 7 Infectious Diseases Associated with Trauma and Outdoor Activities, 103**
 - Introduction, 103
 - Case 7.1 A 30-year-old man with thumb infection and forearm nodules, 103
 - Case 7.2 Severe infection and sepsis following recreational fishing, 108
 - Classification and characteristics of infectious diseases associated with trauma and outdoor activities, 114
- 8 Acute and Chronic Subcutaneous Fungal Infections, 121**
 - Case 8.1 Exophytic skin lesion masquerading as cancer, 121
 - Case 8.2 Chronic persistent subcutaneous fungal infection of the leg, 124
 - Case 8.3 A young man with a laceration injury contaminated with soil, 130
- 9 Endocarditis with Unusual Organisms or Characteristics, 137**
 - Case 9.1 Man with dyspnea, cough, fever, and weight loss, 137
 - Case 9.2 Confusing staining characteristics and false identification of a pathogen by automated system in a seriously ill patient, 143
- 10 Severe Systemic Fungal and Other Infections in AIDS Patients, 153**
 - Case 10.1 HIV patient with progressive shortness of breath, 153
 - Case 10.2 Recurrent multiorgan infection in an immunocompromised patient, 161
- 11 Toxic Manifestations of Infectious and Non-infectious Diseases, 171**
 - Case 11.1 An odd presentation for toxic shock syndrome, 171
 - Case 11.2 A peculiar and dramatic presentation of septic shock, 176

Case 11.3 A 45-year-old woman with rash, hepatitis, and lymphadenopathy, 185

12 Skin and Soft Tissue Infections Seen Post Hurricane Katrina in 2005, 195

Introduction, 195

Case 12.1 A 76-year-old Caucasian female with leg laceration, 195

Case 12.2 A 76-year-old man with rapid-onset cellulitis, 198

Case 12.3 A 61-year-old man with diabetic neuropathy, 200

Case 12.4 A 45-year-old man from a refugee camp with calf laceration, 201

General comments on soft tissue infections in relation to Hurricane Katrina, 202

13 Other Miscellaneous Infections, 211

Case 13.1 A 17-month-old child with facial swelling and adenopathy, 211

Case 13.2 Persistent headache in a 50 year old with known migraine, 217

Case 13.3 A 54-year-old man with skin lesions with central numbness, 223

Case 13.4 Delayed diagnosis in a young woman with migratory joint pain, 231

Index, 241

Protein	mg/dL	6.00-8.30
O ₂ saturation	%	95-99 (arterial/capillary); 92-94 (venous)
Glucose (fasting)	mg/dL	65-99
Blood urea nitrogen	mg/dL	7-18
Creatinine	mg/dL	0.6-1.3
Sodium	mmol/L	135-148
Potassium	mmol/L	3.5-5.3
Alanine aminotransferase (serum glutamic pyruvic transaminase)	IU/L	12-78
Aspartate aminotransferase (serum glutamic oxalo- acetic transaminase)	IU/L	15-37
Albumin	g/dL	3.4-5.0
Alkaline phosphatase	IU/L	45-117
Total bilirubin	mg/dL	0.2-1.0
Lactate dehydrogenase	IU/L	84-246
