

171	PART III. FOODBORNE PATHOGENS
183	10. <i>Staphylococcus aureus</i>
220	11. <i>Listeria monocytogenes</i>
254	12. <i>Salmonella enterica</i>
278	13. SHIGA TOXIN-PRODUCING <i>Escherichia coli</i>

303	PART IV. CONTROL OF FOODBORNE MICROORGANISMS
307	14. THERMAL RESISTANCE OF MICROORGANISMS IN FOOD
322	15. PRODUCTION OF BACTERIOICINS IN MILK

CONTENTS

PREFACE	vii
PART I. BASICS OF FOOD MICROBIOLOGY	
LABORATORY	1
1. LABORATORY SAFETY	3
2. SAMPLING FOR MICROBIOLOGICAL ANALYSIS OF FOOD AND PROCESSING ENVIRONMENT	13
3. ENUMERATION OF MICROORGANISMS IN FOOD	28
4. PRACTICING BASIC TECHNIQUES	46
PART II. FOOD MICROBIOTA	63
5. AEROBIC MESOPHILIC PLATE COUNT	71
6. MESOPHILIC SPOREFORMING BACTERIA	88
7. <i>Pseudomonas</i> SPECIES AND OTHER SPOILAGE PSYCHROTROPHS	108
8. DETECTION AND ENUMERATION OF <i>Enterobacteriaceae</i> IN FOOD	121
9. EXAMINATION AND ENUMERATION OF FOODBORNE FUNGI	138

PART III. FOODBORNE PATHOGENS	171
10. <i>Staphylococcus aureus</i>	183
11. <i>Listeria monocytogenes</i>	220
12. <i>Salmonella enterica</i>	254
13. SHIGA TOXIN-PRODUCING <i>Escherichia coli</i>	278
PART IV. CONTROL OF FOODBORNE MICROORGANISMS	303
14. THERMAL RESISTANCE OF MICROORGANISMS IN FOOD	307
15. PRODUCTION OF BACTERIOCINS IN MILK	328
APPENDIX I LABORATORY EXERCISE REPORT	346
APPENDIX II BACTERIAL AND FUNGAL STRAINS RECOMMENDED FOR USE AS CONTROL ORGANISMS	351
APPENDIX III MICROBIOLOGICAL MEDIA	354
APPENDIX IV SUPPLIES AND EQUIPMENT AVAILABILITY	372
INDEX	379
