INDEX	207

ACKNOWLEDGMENTS

"The Socratic Method" was originally translated by Hugh Jedell and "The World-View of Ethics and Religion" by W. Lansdell. Thomas K. Brown III has revised both translations and brought their terminology and style into harmony with the other essays. These and the other essays have been edited by Marion Kuhn. L. H. Grunebaum planned the translation of this collection of essays and is responsible for the addition of the starred footnotes and of the excerpts from Plato's *Theætetus*.
