<b>1</b>	<b>Physico-chemical Data and Resources</b> . . . . .	<b>1</b>
1.1	Periodic Table of the Elements . . . . .	1
1.2	Resources and Databases . . . . .	2
1.3	Units and Constants . . . . .	3
1.3.1	Decimal Factors . . . . .	3
1.3.2	The Greek Alphabet . . . . .	3
1.3.3	SI Base Parameters and Units . . . . .	3
1.3.4	Important Physico-chemical Parameters and Units . . . . .	4
1.3.5	Important Physico-chemical Constants . . . . .	5
1.3.6	Conversion Factors . . . . .	5
1.3.7	Thermodynamic Properties of Select Substances . . . . .	6
1.4	Summary of Important Formulae and Equations . . . . .	6
<b>2</b>	<b>Thermodynamics</b> . . . . .	<b>13</b>
2.1	Motivation, Revision and Introduction of Basic Concepts . . . . .	13
2.1.1	Fundamental Terms and Concepts . . . . .	14
2.1.2	The 0th Law of Thermodynamics . . . . .	22
2.1.3	Equations of State . . . . .	23
2.1.4	Energy . . . . .	24
2.1.5	The 1st Law of Thermodynamics . . . . .	24
2.1.6	Work . . . . .	26
2.1.7	Heat Capacity at Constant Volume . . . . .	29
2.1.8	Enthalpy . . . . .	30
2.1.9	Heat Capacity at Constant Pressure . . . . .	33
2.1.10	Entropy . . . . .	34
2.1.11	The 2nd Law of Thermodynamics . . . . .	35
2.1.12	The 3rd Law of Thermodynamics . . . . .	36
2.1.13	Entropy and the Gibbs Free Energy Change . . . . .	37
2.1.14	Inter-relatedness of Thermodynamic Quantities . . . . .	38
2.2	Free Energy . . . . .	39
2.2.1	The Gibbs Function . . . . .	39
2.2.2	Gibbs Free Energy and the Entropy of the Universe . . . . .	40
2.2.3	The Helmholtz Free Energy . . . . .	41

2.2.4	Free Energy Available to Do Useful Work . . . . .	42
2.2.5	Gibbs Free Energy Change for a Reaction (Part 1) . . . . .	43
2.2.6	Temperature Dependence of the Equilibrium Constant . . . . .	44
2.2.7	Pressure Dependence of the Gibbs Free Energy . . . . .	45
2.3	Properties of Real Systems . . . . .	48
2.3.1	Chemical Potential . . . . .	48
2.3.2	Open Systems and Changes of Composition . . . . .	49
2.3.3	Fugacity: A Pressure Substitute for Non-ideal Gases . . . . .	50
2.3.4	Solutions . . . . .	51
2.3.5	The Gibbs-Duhem Equation . . . . .	53
2.4	Exercises . . . . .	54
<b>3</b>	<b>Mixtures and Phases . . . . .</b>	<b>57</b>
3.1	Why Do or Don't Things Mix . . . . .	57
3.1.1	Gases . . . . .	57
3.1.2	Liquids . . . . .	59
3.2	Liquids . . . . .	61
3.2.1	Chemical Potential of Liquid Solutions . . . . .	61
3.2.2	Raoult's Law . . . . .	62
3.2.3	Activity: Mole Fraction for a Non-ideal Solution . . . . .	63
3.2.4	Gibbs Free Energy Change for a Reaction (Part 2) . . . . .	64
3.3	Phase Equilibria . . . . .	66
3.3.1	Phase Diagrams and Physical Properties of Matter . . . . .	66
3.3.2	Phase Diagrams with Isotherms . . . . .	68
3.3.3	Phase Transitions . . . . .	70
3.3.4	The Gibbs Phase Rule . . . . .	70
3.3.5	One Component Systems: Carbon Dioxide . . . . .	71
3.3.6	One Component Systems: Water . . . . .	73
3.3.7	One Component Systems: Helium . . . . .	74
3.3.8	Other Phases . . . . .	76
3.4	Thermodynamic Aspects of Phase Transitions . . . . .	76
3.4.1	Temperature Dependence of Phase Stability . . . . .	76
3.4.2	Entropies of Substances . . . . .	78
3.4.3	Pressure Dependence of Melting . . . . .	79
3.4.4	Pressure Dependence of Vapour Pressure . . . . .	81
3.4.5	Phase Boundaries . . . . .	82
3.4.6	Phase Boundaries: Solid-Liquid . . . . .	83
3.4.7	Phase Boundaries: Liquid-Vapour . . . . .	84
3.4.8	Phase Boundaries: Solid-Vapour . . . . .	85
3.4.9	The Ehrenfest Classifications . . . . .	86
3.5	Mixtures of Volatile Liquids . . . . .	87
3.5.1	Phase Diagrams of Mixtures of Volatile Liquids . . . . .	87
3.5.2	Simple Distillation . . . . .	91
3.5.3	Fractional Distillation . . . . .	92

3.5.4	Mixtures of Volatile Liquids with Azeotropes . . . . .	96
3.5.5	Mixtures of Immiscible Liquids . . . . .	97
3.5.6	Phase Diagrams of Two-component Liquid/Liquid Systems . . . . .	97
3.5.7	Phase Diagrams of Two Component Liquid–Vapour Systems . . . . .	99
3.5.8	Phase Diagrams of Two-component Solid–Liquid Systems . . . . .	100
3.5.9	Phase Diagrams of Three-component Systems . . . . .	100
3.5.10	Cooling Curves . . . . .	101
3.6	Exercises . . . . .	103
<b>4</b>	<b>Solutions of Electrolytes . . . . .</b>	<b>105</b>
4.1	Fundamental Concepts . . . . .	105
4.1.1	Ions in Solution . . . . .	105
4.1.2	Charge and Electroneutrality . . . . .	106
4.1.3	Electric Current . . . . .	107
4.1.4	Electric Potential . . . . .	108
4.1.5	Resistance . . . . .	110
4.1.6	Conductivity and Conductance . . . . .	112
4.2	Electrochemical Reactions . . . . .	112
4.2.1	Galvanic and Electrolytic Cells . . . . .	113
4.2.2	The Faraday Laws . . . . .	115
4.2.3	The Electromotive Force . . . . .	116
4.2.4	Concentration Dependence of the Electromotive Force . . . . .	119
4.2.5	Combination of Two Half-Cells . . . . .	121
4.2.6	The Thermodynamics of the Electromotive Force . . . . .	124
4.2.7	Reference Electrodes . . . . .	124
4.2.8	Standard Electrode Potentials . . . . .	126
4.2.9	Absolute Electrode Potentials . . . . .	127
4.2.10	External Potential Difference . . . . .	128
4.3	Electrolytes in Solution . . . . .	130
4.3.1	Solubility Product . . . . .	130
4.3.2	Colligative Properties and the van't Hoff factor . . . . .	133
4.3.3	Degree of Dissociation . . . . .	135
4.3.4	Activities and Ionic Strength . . . . .	136
4.3.5	pH Buffers . . . . .	137
4.3.6	Applications of Conductivity Measurements . . . . .	141
4.3.7	The Debye–Hückel Theory . . . . .	142
4.3.8	Tonicity . . . . .	144
4.4	Exercises . . . . .	146
<b>5</b>	<b>Molecules in Motion . . . . .</b>	<b>147</b>
5.1	Transport Processes . . . . .	147
5.1.1	The Kinetic Molecular Theory of Gases . . . . .	148
5.1.2	The Maxwell–Boltzmann Distribution . . . . .	149
5.1.3	Transport Properties . . . . .	150

	5.1.4	Diffusion: Flux of Matter . . . . .	151
	5.1.5	Thermal Conduction: Flux of Energy . . . . .	152
	5.1.6	Viscosity: Flux of Momentum . . . . .	153
	5.1.7	The Transport Parameters of the Ideal Gas . . . . .	154
5.2		Molecular Motion in Liquid Solutions . . . . .	155
	5.2.1	Conductivities of Electrolyte Solutions . . . . .	156
	5.2.2	Mobilities of Ions . . . . .	158
	5.2.3	Ion-Ion Interactions . . . . .	159
	5.2.4	Diffusion . . . . .	160
	5.2.5	Fick's First Law of Diffusion . . . . .	161
	5.2.6	The Einstein Relation . . . . .	163
	5.2.7	The Stokes-Einstein Equation . . . . .	164
5.3		Exercises . . . . .	165
<b>6</b>		<b>Kinetics . . . . .</b>	<b>167</b>
6.1		Introduction . . . . .	167
	6.1.1	From Thermodynamics to Reaction Kinetics . . . . .	167
	6.1.2	Spontaneous and Non-Spontaneous Reactions, Processes at Equilibrium . . . . .	167
	6.1.3	Stoichiometry and Molecularity . . . . .	169
6.2		Reaction Rates, Rate Constants and Orders of Reaction . . . . .	170
	6.2.1	The Rate of Reaction . . . . .	170
	6.2.2	Rate Laws, Rate Constants and Reaction Order . . . . .	171
	6.2.3	Reaction Profile . . . . .	173
6.3		Rate Equations . . . . .	174
	6.3.1	Differential Rate Equation . . . . .	174
	6.3.2	Integrated Rate Expression for the First Order Rate Law . . . . .	175
	6.3.3	Half-lives and Time Constants . . . . .	177
	6.3.4	Integrated Rate Expression for the Second Order Rate Law . . . . .	179
	6.3.5	Integrated Rate Expression for the Third Order Rate Law . . . . .	180
	6.3.6	Integrated Rate Expression for the Zero-th Order Rate Law . . . . .	182
6.4		Determination of the Rate Law . . . . .	183
	6.4.1	Analysing Data Using the Integrated Rate Laws . . . . .	183
	6.4.2	Experimental Design: Isolation Method . . . . .	184
	6.4.3	Reactions Approaching Equilibrium . . . . .	186
	6.4.4	Relaxation Methods . . . . .	189
	6.4.5	Monitoring the Progress of a Reaction . . . . .	190
	6.4.6	Experimental Techniques for Moderately Fast Reactions . . . . .	192
	6.4.7	Experimental Techniques for Fast Reactions . . . . .	193

6.5	Temperature Dependence of Reaction Rates . . . . .	196
6.5.1	The Arrhenius Equation . . . . .	196
6.5.2	Interpretation of the Arrhenius Equation . . . . .	197
6.6	Linking the Rate Laws with Reaction Mechanisms . . . . .	198
6.6.1	Elementary Reactions . . . . .	199
6.6.2	Consecutive Elementary Reactions . . . . .	200
6.6.3	Steady-State Approximation . . . . .	201
6.6.4	The Rate-Determining Step . . . . .	204
6.6.5	Pre-Equilibria . . . . .	205
6.6.6	Kinetic and Thermodynamic Control . . . . .	206
6.6.7	The Lindemann–Hinshelwood Mechanism . . . . .	206
6.7	Polymerisation Kinetics . . . . .	209
6.7.1	Stepwise Polymerisation . . . . .	209
6.7.2	Chain Polymerisation . . . . .	211
