Contents

1 Sample Size, Mean, Standard Deviation, and Standard Error of the Mean 1
1.1 Mean 1
1.2 Standard Deviation 2
1.3 Standard Error of the Mean 3
1.4 Sample Size, Mean, Standard Deviation, and Standard Error of the Mean 4
1.4.1 Using the Fill/Series/Columns Commands 4
1.4.2 Changing the Width of a Column 6
1.4.3 Centering Information in a Range of Cells 7
1.4.4 Naming a Range of Cells 8
1.4.5 Finding the Sample Size Using the =COUNT Function 10
1.4.6 Finding the Mean Score Using the =AVERAGE Function 10
1.4.7 Finding the Standard Deviation Using the =STDEV Function 10
1.4.8 Finding the Standard Error of the Mean 10
1.5 Saving a Spreadsheet 13
1.6 Printing a Spreadsheet 14
1.7 Formatting Numbers in Currency Format (Two Decimal Places) 15
1.8 Formatting Numbers in Number Format (Three Decimal Places) 17
1.9 End-of-Chapter Practice Problems 18
References 20

2 Random Number Generator 21
2.1 Creating Frame Numbers for Generating Random Numbers 21
2.2 Creating Random Numbers in an Excel Worksheet 25

2.3 Sorting Frame Numbers into a Random Sequence 27
2.4 Printing an Excel File So That All of the Information Fits onto One Page 31
2.5 End-of-Chapter Practice Problems 34

3 Confidence Interval About the Mean Using the TINV Function and Hypothesis Testing 37
3.1 Confidence Interval About the Mean 37
3.1.1 How to Estimate the Population Mean 37
3.1.2 Estimating the Lower Limit and the Upper Limit of the 95 % Confidence Interval About the Mean 38
3.1.3 Estimating the Confidence Interval for the Number of Outpatient Visits to a Clinic 39
3.1.4 Where Did the Number "1.96" Come From? 40
3.1.5 Finding the Value for t in the Confidence Interval Formula 41
3.1.6 Using Excel's TINV Function to Find the Confidence Interval About the Mean 42
3.1.7 Using Excel to Find the 95 % Confidence Interval for a Clinic's Outpatient Visits 42
3.2 Hypothesis Testing 48
3.2.1 Hypotheses Always Refer to the Population That You Are Studying 49
3.2.2 The Null Hypothesis and the Research (Alternative) Hypothesis 49
3.2.3 The 7 Steps for Hypothesis-Testing Using the Confidence Interval About the Mean 53
3.3 Alternative Ways to Summarize the Result of a Hypothesis Test 59
3.3.1 Different Ways to Accept the Null Hypothesis 60
3.3.2 Different Ways to Reject the Null Hypothesis 60
3.4 End-of-Chapter Practice Problems 61
References 67

4 One-Group t-Test for the Mean 69
4.1 The 7 STEPS for Hypothesis-Testing Using the One-Group t-Test 69
4.1.1 STEP 1: State the Null Hypothesis and the Research Hypothesis 70
4.1.2 STEP 2: Select the Appropriate Statistical Test 70
4.1.3 STEP 3: Decide on a Decision Rule for the One-Group t-Test 70
4.1.4 STEP 4: Calculate the Formula for the One-Group t-Test 71

4.1.5 STEP 5: Find the Critical Value of t in the t-Table in Appendix E 72
4.1.6 STEP 6: State the Result of Your Statistical Test 73
4.1.7 STEP 7: State the Conclusion of Your Statistical Test in Plain English! 74
4.2 One-Group t-Test for the Mean 74
4.3 Can You Use Either the 95 % Confidence Interval About the Mean OR the One-Group t-Test When Testing Hypotheses? 80
4.4 End-of-Chapter Practice Problems 80
References 84

5 Two-Group t-Test of the Difference of the Means for Independent Groups 85
5.1 The Nine STEPS for Hypothesis-Testing Using the Two-Group t-Test 86
5.1.1 STEP 1: Name one Group, Group 1, and the Other Group, Group 2 86
5.1.2 STEP 2: Create a Table That Summarizes the Sample Size, Mean Score, and Standard Deviation of Each Group 86
5.1.3 STEP 3: State the Null Hypothesis and the Research Hypothesis for the Two-Group t-Test 88
5.1.4 STEP 4: Select the Appropriate Statistical Test 88
5.1.5 STEP 5: Decide on a Decision Rule for the Two-Group t-Test 88
5.1.6 STEP 6: Calculate the Formula for the Two-Group t-Test 89
5.1.7 STEP 7: Find the Critical Value of t in the t-Table in Appendix E 89
5.1.8 STEP 8: State the Result of Your Statistical Test 90
5.1.9 STEP 9: State the Conclusion of Your Statistical Test in Plain English! 90
5.2 Formula #1: Both Groups Have a Sample Size Greater Than 30 95
5.2.1 An Example of Formula #1 for the Two-Group t-Test 96
5.3 Formula #2: One or Both Groups Have a Sample Size Less Than 30 103
5.4 End-of-Chapter Practice Problems 111
References 114

6 Correlation and Simple Linear Regression 115
6.1 What Is a "Correlation?" 115
6.1.1 Understanding the Formula for Computing a Correlation 120
6.1.2 Understanding the Nine Steps for Computing a Correlation, r 120
6.2 Using Excel to Compute a Correlation Between Two Variables 122
6.3 Creating a Chart and Drawing the Regression Line onto the Chart 127
6.3.1 Using Excel to Create a Chart and the Regression Line Through the Data Points 129
6.4 Printing a Spreadsheet So That the Table and Chart Fit onto One Page 138
6.5 Finding the Regression Equation 140
6.5.1 Installing the Data Analysis ToolPak into Excel 141
6.5.2 Using Excel to Find the SUMMARY OUTPUT of Regression 144
6.5.3 Finding the Equation for the Regression Line 148
6.5.4 Using the Regression Line to Predict the y-Value for a Given x-Value 149
6.6 Adding the Regression Equation to the Chart 150
6.7 How to Recognize Negative Correlations in the SUMMARY OUTPUT Table 153
6.8 Printing Only Part of a Spreadsheet Instead of the Entire Spreadsheet 153
6.8.1 Printing Only the Table and the Chart on a Separate Page 154
6.8.2 Printing Only the Chart on a Separate Page 154
6.8.3 Printing Only the SUMMARY OUTPUT of the Regression Analysis on a Separate Page 155
6.9 End-of-Chapter Practice Problems 155
References 160

7 Multiple Correlation and Multiple Regression 161
7.1 Multiple Regression Equation 161
7.2 Finding the Multiple Correlation and the Multiple Regression Equation 164
7.3 Using the Regression Equation to Predict FIRST-YEAR GPA 168
7.4 Using Excel to Create a Correlation Matrix in Multiple Regression 168
7.5 End-of-Chapter Practice Problems 172
References 177

8 One-Way Analysis of Variance (ANOVA) 179
8.1 Using Excel to Perform a One-Way Analysis of Variance (ANOVA) 181
8.2 How to Interpret the ANOVA Table Correctly 183
8.3 Using the Decision Rule for the ANOVA F-Test 184
8.4 Testing for the Difference Between Two Groups Using the ANOVA t-Test 185
8.4.1 Comparing Clinic A vs. Clinic C in Time Required to Conduct an Initial Visit Using the ANOVA t-Test 186
8.5 End-of-Chapter Practice Problems 190
References 195

Appendices 197
Appendix A: Answers to End-of-Chapter Practice Problems 197
Appendix B: Practice Test 230
Appendix C: Answers to Practice Test 242
Appendix D: Statistical Formulas 253
Appendix E: t-Table 255
